

## UltraSensitive Protein Detection Unit

Nicole Zehethofer and Thomas Kreisig joined USPDU as new PhD students in the last days.

Nicole has done her Master of Science in Chemistry at the Dalhousie University, Halifax, Canada. She has worked with a variety of different mass spectrometry techniques and will work with our new Orbitrap XL mass spectrometer with ETD function.

Thomas studied Analytical Chemistry and performed his diploma thesis at Beiersdorf AG Hamburg, Germany. He has experience on different HPLC methods and will work on the further optimization of our staining techniques.

More about Nicole and Thomas and their publications here: [CV Nicole](#), [CV Thomas](#)
